POSTERIZE

Poster Presentation

Objective: Design a captivating and informative poster that effectively communicates your research to a broad audience of researchers at a conference or seminar.

Design Flow Objective (Presentation Format):

A Poster combines text and graphics to make a presentation that communicates your research. It advertises your research in a catchy and informative manner

Typically, a professional poster involves showing your work to numerous researchers at a conference or seminar. As the viewers walk by, your poster should quickly and efficiently communicate your research.

After successful registration, participants submit their poster on the Google form provided on the website before the event's due deadline. All such posters received will be evaluated by professors and the accepted or shortlisted posters will be intimated to present a respective measurement (on A2 paper) poster (banner) on the day of the event physically. The best performers and posters are awarded prizes and certifications.
