TECHNOVATE

Paper Presentation

Objective: Design a captivating and informative paper presentation that effectively communicates your research to a broad audience of researchers at a conference or seminar.

Design Flow Objective (Presentation Format):

A paper presentation is an event where participants create a paper about a specific topic or area and then present it in front of a jury or audience. It combines written research with effective communication to share knowledge and insights with others.

A paper can be an abstract or any innovative idea. After successful registration, participants submit their paper research or study on the Google form provided on the website before the event's due deadline. All such papers received will be evaluated by professors and the accepted or shortlisted papers will be intimated to present MS-PPT on the day of the event physically along with their documentation. Following the presentations, participants will be further shortlisted based on their performance, and a viva will be conducted for the selected candidates.

Finally, the best performers and outstanding papers will be recognized with prizes and certificates.

List of Topics:

- 5G Technology and its Applications
- Electronics Waste (E-Waste)
- Indian Knowledge Systems (IKS) in Space Technology
- Internet of Things (IoT)
- VLSI and Embedded Technology
- Nano Electronics and Nano Technology
- Image, Video, or Signal Processing
- Wireless Communications
- Analog and Digital Communications
- Blockchain Technology

- Robotics Automation
- Antenna Design and Communication
- Optical Communication
- Space Technology
- Data Analytics and Sciences
- Artificial Intelligence and Machine Learning
- And Other Innovative Topics

Rounds:

Round 1:

- Google form submission through online.
- After submission judges finalize the shortlist.

Round 2:

- The selected candidates present their ppt's

Round 3:

- The final shortlisted participants attend the viva voce examination

Rules:

1. Participants should register themselves from our website -.
2. A maximum of 2 candidates are allowed per paper (even a single candidate can submit).
3. Papers should obey the given list of topics and domain knowledge.
4. A Paper must be themed well like,
   - ✓ **The Future of Small Satellite**
   - ✓ **Robots: Boon or Curse?**
5. Participants must submit their paper or documentation following the IEEE publication format.
6. No help from Online tools like ChatGPT, Microsoft Copilot…etc. All such papers are rejected and ultimately prohibited.
7. Participants should submit their paper or documentation through Google form *before* **March 31st 6pm** .
8. Papers received through the concerned Google form are only accepted for further evaluation.
   The name of the documentation must be in the format of their names followed by their college name.
   Ex. ParticipantName_CollegeName.pdf (prefer .pdf format)

9. Accepted papers will be intimated through their respective mail IDs and WhatsApp prior to 2 days before the event.
10. All such accepted candidates must present MS-PPT at the time of the event physically along with a hard copy of their paper or documentation. (A4 paper) at the time of the event physically.
11. The presentation time is 8 mins and queries for 2 mins for each poster.
